

Goldene

(Ready-To-Use)

'Goldene' is a specifically formulated teat sanitiser utilising Iodine and glycerine to give effective control of mastitis in dairy cattle. It also is an aid to controlling teat cracking and chapping.

IG-100 (Ready-To-Use)

CODE IG-100 GOLDENE (Ready-To-Use)

APPLICATION

'GOLDENE' is to be used as an individual 'Teat Dip' after regular milking and as a localized 'Teat Spray' to maintain and complete udder care. For dipping and spraying cow's teats after milking to assist in control of Mastitis. Destroys Mastitis germs on the skin and protects the open teat orifice after milking.

Ready to Use will not taint milk when used as directed.

PRINCIPAL FEATURES

- IG-101, in many applications, has become the gold standard for infection reduction and prevention.
- IG-101 has become an integral part of the strategy to prevent the transmission of disease and infections.
- Glycerol to reduce sensitive, easily-irritated skin because it prevents skin dryness with its moisturizing properties.
- Glycerol draws moisture up through skin layers and slows or prevents excessive drying and evaporation.
- Glycerol is used in medical and pharmaceutical and personal care preparations, mainly as a means of improving smoothness, providing lubrication and as a humectant.
- Improves overall Teat Condition.
- N.P.E. FREE

ENVIRONMENTAL SAFETY:

- Product is soluble in water.

COMPOSITION/INFORMATION ON INGREDIENTS

Chemical name	Concentration
Iodine	5.0 g/L
Glycerine	100 g/L

PHYSICAL AND CHEMICAL PROPERTIES

Appearance:	Dark brown in color
Odor:	Pungent Odor
Boiling Point:	100°C
Solubility in Water:	100%
Specific Gravity:	1.0 (Water = 1)
Flash Point:	Not applicable
pH:	6-7

U.N. References: Not Applicable

Compliance: APVMA: 51706/107484

USE INSTRUCTIONS

GOLDENE – Ready to Use is formulated for the use without dilution.

- Decant fresh product daily.
- Teats should be wiped and dry before milking to reduce iodine residue in milk.
- When dipping use a teat dipping cup (plastic or other non-metal type container) to hold the product and dip each teat of each cow after milking.
- If spraying, thoroughly spray the udder area to ensure all over cover of cow's teats by spraying upwards from underneath the teats, not from the side, and ensure the whole surface of each teat is covered.

SAFETY DIRECTIONS

For cautionary and first aid information, consult your Safety Data Sheet or label.

PACKAGING:

25L, 110L, 205L, 1000L containers

25L
(28.25kg)

205L
(226 kg)

1,000L
(1,130 kg)
