

# **Goldene**

## **Iodophor**

*'Goldene' is a specifically formulated teat sanitiser utilising Iodine and glycerine to give effective control of mastitis in dairy cattle. It also is an aid to controlling teat cracking and chapping.*

**IG-101 (Iodophor-concentrate)**

## CODE IG-101 GOLDENE (Iodophor-concentrate)

### APPLICATION

'Goldene is to be used as an individual 'Teat Dip' after regular milking and as a localized 'Teat Spray' to maintain and complete udder care.

### PRINCIPAL FEATURES

- IG-101, in many applications, has become the gold standard for infection reduction and prevention.
- IG-101 has become an integral part of the strategy to prevent the transmission of disease and infections.
- Glycerol to reduce sensitive, easily-irritated skin because it prevents skin dryness with its moisturizing properties.
- Glycerol draws moisture up through skin layers and slows or prevents excessive drying and evaporation.
- Glycerol is used in medical and pharmaceutical and personal care preparations, mainly as a means of improving smoothness, providing lubrication and as a humectant.
- Improves overall Teat Condition.
- N.P.E. FREE

### ENVIRONMENTAL SAFETY:

- Product is soluble in water.

### COMPOSITION/INFORMATION ON INGREDIENTS

Chemical name	Concentration
Iodine	20 g/L
Glycerine	58.6 g/L

### PHYSICAL AND CHEMICAL PROPERTIES

Appearance:	Dark brown in color
Odor:	Smell of Iodine
Boiling Point:	100°C
Solubility in Water:	100%
Specific Gravity:	1.05 g/mL @ 20°C
Flash Point:	Not applicable
pH:	Slightly acidic

**U.N. References:** Not Applicable

**Compliance:** APVMA: 36102/107488

### USE INSTRUCTIONS

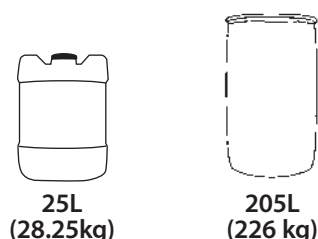

- To make a minimum of 0.5% available iodine in final solution, dilute 1 part of GOLDENE in 3 parts clean water (cool tap water previously boiled or certified potable water).
- Water not to be above 30°C.
- Additional Emollient (GLYCOTE) may be included to a maximum of 10%. If emollient is added, dilute 5 parts of GOLDENE in 7 parts clean water and 1 part GLYCOTE.
- **DIP:** Use a plastic or other non-metal type container for iodine solution. Clean out dip cup as teat get low. DO NOT just top up the dip.
- **SPRAY:** Spray upwards from underneath the teats, not from the side and ensure the whole surface of each teat is covered.

### SAFETY DIRECTIONS

For cautionary and first aid information, consult your Safety Data Sheet or label.

### PACKAGING:

20L, 200L, containers
