**YOU SAVE
\$142.50**

Jaegar Australia's unique mix of Dairy Acid, Dairy Alkali and a Dairy Sanitiser specially formulated to give the farmer the quickest and best result for the least amount of effort.

INTRODUCTORY OFFER PRODUCTS EXPLAINED:

Dairy Alkali HT-108: A blend of caustic and heavy-duty alkaline salts designed to remove all soils and hard water deposits from all surfaces.

Benefits:

1. Heavy-duty caustic based C.I.P detergent.
2. DAIRY ALKALI 108 is highly sequestered making it suitable for use in soft or hard water.
3. DAIRY ALKALI 108's ability to rapidly wet and keep soils suspended in solution, allows the following detergents to act more efficiently in continued soil removal.
4. DAIRY ALKALI 108's high alkalinity raises the pH, improving cleaning action, by emulsifying oils and allowing soils to be removed quickly from all surfaces.

Dairy Chem Acid Milk Stone Remover RS-103:

Dairy Chem Acid powder RS-103 is a low foaming high strength powdered acid cleaner designed for the removal of mineral soils from stainless steel food processing equipment. Dairy Acid powder 103-A finds general application in the dairy industry for the removal of milk stone and hard water deposits from vaccreators, evaporators, plate heat exchanges, vats, tankers and pipe lines by circulation or spray cleaning.

Benefits:

1. Removes solids quickly.
2. Completely safe on 304 and 316 stainless steel.
3. Not affected by hard water.
4. Freely risible - no residual streaks or deposits.
5. Completely soluble.
6. Low foaming - prevents pump cavitation.

PTSAN 5:

Is a clear non-foaming biodegradable, non-residual sanitizer for use in wineries, breweries, dairies, laundries and all food processing plants at a dilution rate of 1:100. PTSAN 5 is recommended for use in any area, which requires the immediate reduction of microbial contamination.

Benefits:

1. Extremely effective against a wide range of contaminants including Aerobic and anaerobic bacteria, spores, yeast, mould, fungi and viruses.
2. Rapid in its action even at ambient temperature ideally 20°C.
3. Minimal contact time required 10 - 30 minutes depending on the degree of soiling.
4. No rinsing required if good drainage is available.
5. Safe on stainless steel plant and equipment. Not recommended for use on mild steel, copper or copper alloys.
6. PTSAN 5 Sanitiser has Aqis approval for use in all meat, fish processing and dairy plants.
