PERATEC PLUS FUNGICIDE

**Engineered to react,
then bio-degrade.**

**The only solution
that Kills in
24 HOURS!**

**Multiple Disease
Applications for
Fruit & Vegetables**

APPLICATION GUIDELINES

Curative:

Apply immediately at first signs of infection. Spray diseased plants using a concentration of 1L **Peratec PLUS Fungicide** to 150 Litres of water. Where there is a high concentration rate of a fungal growth Apply at a spray of 1L **Peratec PLUS Fungicide** to 100 litres of water.

Non-residual:

Product can be sprayed up to the day of harvest. Peratec Plus Fungicide is effective immediately resulting in the drying up of all infected fruit.

Preventative:

Apply immediately at first signs of infection. Spray diseased plants using a concentration of **PP**: 1L to 150 litres of water.

Coverage:

- Spray at the rate of 1000 Lt/Per hectare to run off **DEPENDING ON AMOUNT OF FOLIAGE!**
- Peratec **MUST** have **FULL CONTACT to be EFFECTIVE!**
- To obtain **BEST** results a neutral wetter is advisable to aid good coverage.

Disease Targeting:

Product can be sprayed up to the day before harvest. Peratec Fungicide is effective immediately resulting in the drying up of all infected fruit.

The rule of thumb - the Three T's of good spray application:

Type, Timing and Technique. Like three links in a chain, ensure each factor in spraying is of good quality for good management.

Mixing:

Reduced results may occur if hard water or water containing suspended clay or organic matter is used. Use the spray mix within 24 hours of preparation.

Compatibility:

Do not mix with other fungicides or pesticides.

MODE OF ACTION:

Peratec Fungicide utilises peroxygen chemistry that has been specifically formulated for Agricultural field crops, broad hectare crops and non-food crops. This is a 'New' and 'Established' tool to fight against Botrytis, Powdery & Downy Mildew, Phytophthora and other fungal diseases across many different types of plants.

The Grape growing industry has been the biggest success story in recent times from Peratec Fungicide. The NEW & improved **Peratec PLUS Fungicide** also will not harm the environment or pose a risk to human health and safety.

Peratec PLUS Fungicide targets the disease, kills it, and then dissipates into the air and water. Making it completely Bio-degradable with no lasting residue.

WITHHOLDING PERIODS	
Grapes: Dried, Table And Wine	DO NOT APPLY LATER THAN 1 DAY BEFORE HARVEST
Brassica Vegetables: Broccoli, Brussels Sprouts, Cauliflower, Cabbage
