“Innovative Winery Cleaning Solutions”

## Formulated & Produced in Australia

Jaegar Australia’s successful enterprise began in 1979, and quickly became one of Australia’s foremost Creative Formulators of quality industrial and agricultural cleaning products.

Jaegar Australia maintains a high standard of quality, through strict quality controls and the implementation of the ISO9001 accreditation.

Jaegar Australia has worked in conjunction with EnolTech, Australia’s leading supplier of Sustainable Winemaking Technologies, to develop a range of innovative winery cleaning solutions. The Wine Industry Product Range focuses on an industry that appreciates and demands High Quality products with an awareness of it’s Environmental Responsibilities.

So call our qualified Wine Industry professionals at EnolTech, to discuss your cleaning solutions.

## Brief Product Overviews (for full details go to the website)

### MAGNUM

Is heavy-duty potassium hydroxide based C.I.P detergent made from a blend of heavy-duty alkaline salts designed to remove all soils, hard water deposits and tartrates from all surfaces importantly in C.I.P. & S.I.P. cleaning. (\*NB: Magnum is an extremely powerful alkaline liquid and should be used with great caution)

### SANITEX

Citric based (acidic) liquid detergent cleaner & sanitiser/biocide. A simple one process product that can be used at ambient or 40-45°C water to clean & sanitise to remove mild wine film, protein, organic soils and colours from all CIP & SIP stainless steel surfaces.

### S11

Aqueous CIP sodium based detergent powder. S11 is a blend of heavy-duty alkaline salts designed to remove tartrate built up, protein, colour, all soils along with hard water deposits from all surfaces in C.I.P & S.I.P cleaning.

### P19

CIP Potassium based detergent powder. P19 is a blend of heavy-duty alkaline salts designed to remove all soils and hard water deposits from all surfaces importantly in C.I.P. & S.I.P. cleaning. P19 is a biodegradable potassium product and is a preferred chemical (compared with sodium) in eco systems.

### STAINAWAY

One process Peroxy-alkaline detergent & sanitiser. STAINAWAY is a concentrated powder which cleans and removes protein stains, wine-colour film, black mould/mildew, and organic soils and does not require a citric neutralising rinse.

### TARTARISAN

TARTARISAN is a one process peroxyacid Tartaric based sanitiser. It is a clear, fine liquid with a mild peroxide-acid odour in which is balanced and stabilised tartaric peroxyacid.

### CITRISAN

CITRISAN is a one process Peroxyacid Citric based sanitiser. An acid-oxidising sanitiser of bacteria, yeast and other microbes with a neutralization of incidental surface chloride for stainless steel and associated surfaces, HDPE/PP plastic, glass and flexible wine transfer hoses.

### BARREL REVIVE

BARREL REVIVE is a specialised treatment for tainted oak barrel surfaces. Best when used in a hot soaking solution and, through oxidising effervescent action on the internal barrel surfaces, decolourises any wine-stain, oxidises microbes, assists in eliminating VA and Brettanomyces as well as neutralises excess sulphur and chlorine. Revives barrels otherwise considered beyond further use and can decolourise barrels stained with red wines for use with white wines. Useful sanitation and general hygiene for oak barrels.

## Customer service

Jaegar Australia takes pride in a tried and trusted hands on working relationship with its customers to ensure they get the most effective cleaning solutions for their requirements. No customer is too big or small for the Jaegar Australia customised solutions, as there are many different problems that arise in the process of wine making. Jaegar works hand in hand with its specialised distributor **Enoltech** with the goal of constant improvement in the chemicals and service we supply.

## Further information

Technical data sheets (TD) are available via **Enoltech** or at [www.jaegaraustralia.com.au](http://www.jaegaraustralia.com.au) under the winery section.

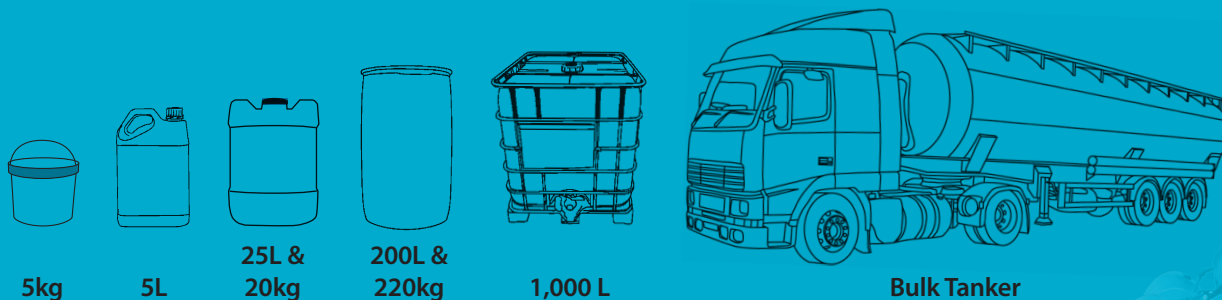

## Compliance & Procedures

All Jaegar Chemicals are made to comply with AQIS & food handling standards Australia.

All cleaning chemicals and storage containers used at your plant comply to the following Occupational and Safety Acts, regulations and Code of Practices

- *Occupational Health and Safety Act 1985*
- *Dangerous goods Act 1985*
- *Dangerous goods (Storage & Handling) Regulation 1989*
