

Graffiti Remover 104

Graffiti Remover

GR-104

DESCRIPTION:

Graffiti Remover 104 is a non-toxic biodegradable graffiti remover formulated to remove all types of graffiti from surfaces.

Benefits

- Will remove Graffiti completely. Has no effect on most substrates.
- Will remove all types of pressure pack paint, pencil and texta colours.
- Will remove Graffiti even on porous surfaces.
- Non-Toxic.
- Completely biodegradable and environmentally friendly.
- Contains no chlorinated hydrocarbons, which are dangerous to the user and dangerous to the environment.
- Contains no carcinogens.
- Very low flammability – Safe for use indoors.
- Spray on application – product has a very high boiling point and does not evaporate quickly thus eliminating the need for gel type application.
- Economical in use.

METHOD OF USE:

1. Spray the affected area with Graffiti Remover 104 and wait 2-3 minutes.
2. Re-spray to keep the surface wet.
3. If the surface is porous, i.e. concrete or brick, scrub with a stiff bristle brush.
4. If the surface is painted or has a smooth finish, wipe with a clean rag.
5. The Graffiti is easier to remove when it is fresh (less than 3 days old), quick response will ensure easy removal.
6. When the surface is clean, wash the area with detergent and warm water to remove the last traces of Safety First Graffiti Remover as prolonged exposure may damage painted or plastic surfaces.

PRECAUTIONS:

Although the product is non-toxic and biodegradable it should be handled with care. Rubber gloves and safety glasses should be used when handling the product. In the case of ingestion, skin or eye contaminations refer to the Material Safety Data Sheet.

Important Note For User: The information and data contained in this publication are based on our current knowledge of the product. The company has no control over the use and processing of its products by our customers, and disclaims any warranty of fitness for use or a particular purpose. This information must on no account be used as a substitute for prior testing, which is essential to ensure that the product is suitable for each specific case. Since, it is the users responsibility to determine the suitability of the product for his/her own use, he/she should thoroughly test any application, and independently conclude satisfactory performance before utilization. Suggestion of use should not be taken as an inducement to infringe any particular patent.
