

### Major Recommended Uses:

Graffiti Protector is used as a see through coating for use on walls and surfaces prone to graffiti damage. Once applied the dried coating can usually be cleaned using warm detergent solution.

### Recommended Application Method:

Graffiti Protector is applied using brush or roller as per normal paint. Note that the material is packaged dry under nitrogen and will gel on prolonged exposure to air. Clean up with mineral turpentine or thinners.

### Typical Data:

Appearance	A translucent free flowing liquid.
Specific Gravity	0.98 - 1.00
Viscosity	100 cS
Total solids	16 - 20%
Flash point	76 C
Silicone type	Dimethylpolysiloxane
