

SPARKLE

Industrial strength concentrated machine dishwashing powder

KD-101

Sparkle represents the latest in machine dishwashing technology and performs two important functions:

- Ensures outstanding cleaning of dishes, glasses and cutlery with every wash:
- Minimises and controls unwanted scale build-up and staining on the inside of the machine.

BENEFITS:

1. Exhibits all the benefits and all the power associated with powders in providing spotlessly clean dishes, glasses and cutlery right throughout the working day.
2. Removes all soils generally encountered including those, which are considered very difficult or nearly impossible to remove in an automatic operation.
3. Economy in use. Sparkle performs very satisfactorily at very low dilution rates and is recommended for use at 0.2-0.3% v/v.
4. Provides balanced alkalinity to neutralize soils of an acidic nature.
5. Saponifies and emulsifies oily and greasy soils.
6. Lifts soils cleanly from the surface of plates, cutlery and glassware. Released soils are quickly solubilised enabling the spray jets of the machine to readily dislodge them.
7. Rinses thoroughly and cleanly: does not leave spotting or streaking.
8. Corrosion safe on all metals commonly used in the construction of commercial dishwashers.
9. Reduces or eliminates foaming, which inhibits the efficiency of the pump and cushions the impact of the spray jets.
10. Biodegradable formulation which does not contain any hard detergents and will not pollute rivers, streams or waterways when machine effluent is discharged.
11. Minimises and controls unwanted scale build-up-reduces substantially the need for regular corrective clean down.

Storage: Store in a cool place. Do not store in direct sunlight.

Warning : This substance is caustic. Avoid contact with skin and eyes..

Pack Size: Available in 25 lt and 205 lt containers.
