

RINSE-AID

Heavy duty concentrated machine rinse aid.

KD-105

Description

A concentrated viscous purple liquid specifically formulated to provide spot free rinsing and drying of tableware when used in conjunction with Jaegar's machine dishwashing detergents. and machines which provide a minimum rinse temperature of 82°C.

Benefits

1. Eliminates all spotting and streaking, porcelain and glasses glisten when they emerge from the dishwasher.
2. Metals are spotless and free of film, plastics dry in seconds.
3. No time wasted in tea towelling of dishes which is contrary to health regulations.
4. Enables fast efficient drying and excellent presentation whilst minimising the risk of contamination by towelling.
5. Dishes dry odour free.
6. Minimises time wastage during peak periods of demand on dishwashing machines allowing dishes to be processed through the washing up area as quickly as possible.
7. Rapidly reduces the surface tension of the water allowing it to break very quickly and sheet off evenly.
8. Rinse-Aid is injected into the rinse water at concentrations as low as 50ppm providing greater efficiency at low cost.
9. Minimises scale build-up.
10. Eliminates the need for hand drying.

Directions for use.

For hand washing; One half teaspoon in the rinse section of a double sink is sufficient.

Storage: Store in a cool place. Do not store in direct

Warning : This substance is caustic. Avoid contact with skin and eyes..

Pack Size: Available in 25 lt and 205 lt containers.
