

ECO-TUFF

A caustic liquid laundry detergent additive

LD-101

Eco-Tuff Liquid Laundry Detergent additive LD-101 is a specially formulated heavy-duty laundry detergent designed to remove mineral and vegetable oils, protein and blood stains, a variety of soils commonly found on laundry from food and engineering industries.

Benefits:

1. A unique surfactant system that readily removes all oil stains quickly and effectively.
2. Complex wetting agents facilitates easy removal of stubborn soils and stains.
3. Anti-redeposition agents ensure that soil does not redeposit on garments, leaving a clean wash.
4. Optical brighteners provide that little extra to give clothes a brighter, fresher look.
5. A concentrated, heavy-duty detergent recommended for the processing of whites, colours, cottons and synthetics.
6. Excellent results in either hard or soft water at low to high wash temperatures.

Directions for Use

Usage rates depend on the degree of soiling, types of machines and temperatures. Your technical sales representative will advise you on usage rates specific to your requirements.
