

ECO-SOUR

Laundry Sour and Iron Controlling Agent.

LD-103

Eco Sour is a concentrated sour used to neutralize excess alkalinity and improve washing results by reducing laundry costs and fabric wear.

BENEFITS:

1. Low viscosity liquid, designed for controlled use in all in all automatic dispensing systems. Eliminating the need for messy powdered products.
2. Accurate dispensing of the liquid minimizes the waste experienced in using powdered products.
3. Waste minimization means lower in use laundry costs.
4. Liquid dispensing eliminates the need for operator contact with chemicals reducing the risk of injury and improving occupational health and safety.
5. Eco-Sour LD-103 prevents fabric harshness by bringing the pH to a slightly acidic level.
6. Eco-Sour LD-103 reduces alkalinity of frequently washed items and prevents skin irritation due to residual alkalinity.
7. Eco-Sour LD-103 when added to the final rinse stage improves washing results by dissolving residual water hardness, which can cause staining and greying of fabrics.
8. Eco-Sour LD-103 contains an iron control agent, which reduces the yellowing of fabric due to high iron levels in the water supply.

Directions for Use

Eco-Sour LD-103 is added to the final rinse of the wash cycle at the rate required to reduce the pH to 5.0-6.5.
