

# RUST PREVENTATIVE

Short term, water miscible rust preventative

RP-101

**Rust Preventative RP-101** is a brown emulsified liquid designed for temporary rust prevention and light lubrication.

## Benefits

- Provides effective rust prevention and lubrication on beef rollers, mutton slides and gambrels by leaving a protective coating that is dry to touch.
- Formulated to provide low in use cost by being able to operate over a wide range of conditions.
- Non-flammable and neutral pH working solutions provide complete safety for operators.
- Superior wetting system enables quick and thorough wetting of all surfaces and penetration into tight cracks and crevices.
- Safe for use on all metals.
- Equally effective in hard or soft water.
- Stable over a wide range of temperatures.

## Directions for Use

Parts to be treated should first be cleaned of oil, grease and rust. The hot dip method is recommended when applying Rust Preventative RP-101. Avoid contact with the skin and eyes.

**Concentration:** 10-20% dilution in water, depending on the degree of rust protection or lubrication required.

**Temperature:** 60°C to 70°C

**Time:** Sufficient time for thorough covering of parts and penetration into all surfaces.
