

Tram Wash

High Foaming Tram Wash

Tram Wash is a viscous green foaming solvent detergent based product formulated to remove coal dust, light oils and greases from vehicles, heavy equipment and work shop floors.

BENEFITS:

1. Safe on all painted surfaces, glass, rubber and all vehicle components.
2. Can be applied as thick foam, prolonging the contact time on vertical surfaces, which provides better cleaning.
3. Extremely effective in hard water areas because of its sequester content.
4. Coal based road grime is easily removed without scrubbing.
5. Very free rinsing.
6. Non-flammable therefore safer to use than solvent cleaners.
7. Completely miscible with water.
8. Can be used at varying dilutions to clean workshop floors and vehicle components.
9. Safe on operators.

Directions for Use

Tram wash can be foamed on vehicles or brushed on the surfaces at varying dilutions depending on the amount of soil. Recommended usage rate through a foam unit is 1:40 with water.
